## tec4U – Knowledge Based Systems

Analyse

Consult

Support

tec4U is a software- and engineering company, located in Saarbruecken. Founded in 1999, tec4U provides data service and software for the automotive, electrical equipment, medical devices, ship building, commercial vehicle, textiles and toys industries. tec4U assists and supports companies within the fulfilment of legal specifications, the professional development as well as the commercial vehicle management.

The combination of engineering know-how and expertise in the field of software development is the foundation of the growing success and the continuous opening of new business areas.

tec4U acts as professional partner to the customer with individual assistance to ensure cost reductions, minimize of efforts, time savings and facilitation of work.

### Compliance with Legal and Customer Requirements

tec4U helps with secure business processes and tested product and material data to reduce liability risks, in turn enabling companies to survive in the international market.

### Data Service and Software for Requirement-compliant Products

tec4U supports throughout the entire data management process, from data searches and data collection through to data validation and notification of suppliers or customers to data entry into proprietary or third-party systems.

### Skills Management for Motivated Employees

tec4U assists to identify, document and implement human resource development programs. On behalf of the clients tec4U gains access to numerous regional and national funding options.

### Efficient Commercial Vehicle Management

tec4U advises you with status and potential analyses and accompanies implementation within the scope of an effective success controlling and with the appropriate hardware and software technology.

## Engineering Expertise within Intelligent Software

The more complex a company is the more varied its software requirements will be. tec4U specializes in the development of database-driven, web based, multilingual software tools.

tec4U provides you the following knowledge-based systems:

#### MDS.web

Non-industry-specific software for communicating material data

#### CoChecker

Application for checking compliance of material data from the IMDS

#### IDIS

International Dismantling Information System

#### RRR Toolset

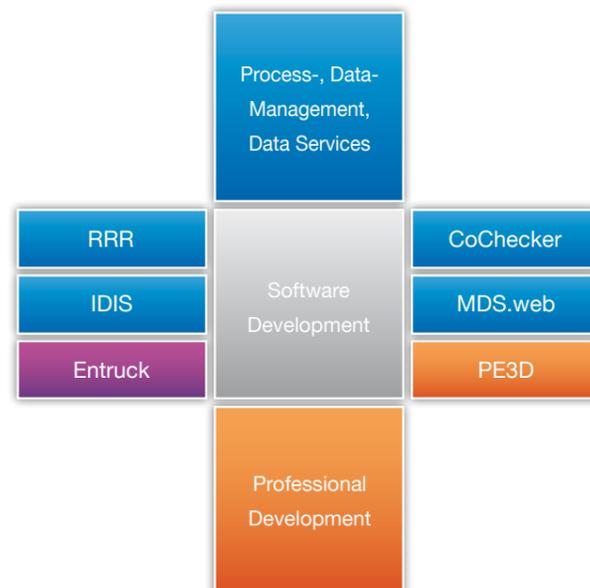

Software that automatically calculates the homologation (product part approval) rate for automobiles

#### Entruck

Success controlling for cost saving measures of freight forwarding companies

#### PE3D

Target/actual comparison to identify professional development needs and qualification potentials of the employees
